

## Tornado Business Center Supports IBM Platforms

**Böblingen, 16th June, 2003.** Tornado Business Center, the flagship product of Intergral GmbH, supports the IBM platforms. Tornado is built on software standards, thus it supports Unix-, Linux-, and Intel hardware platforms. From the software side IBM WebSphere can be used as the application server for Tornado.

Tornado Business Center combines an extensible portal framework with document management functionality. The core of the software is built upon Intergral's technologies (Click & Model™, Adaptive Business Modeler™), which allows the customer to implement complex information and business structures within a short timeframe. Thus, Tornado is not only quickly implemented the first time, but it lets you also change configuration easily to follow your new needs.

Tornado Business Center is used by mid-sized and enterprise customers.
